

Short biography Kristina Radwan

I, Kristina Radwan, work at the Swedish CF Association as a project manager for “Survivors Against All Odds”. I was diagnosed with Cystic Fibrosis when I was 2 months old. Today I’m 59 years old and I live in Stockholm with my daughter Emma Tess, 23 years old. I had a lung transplant 2008. I wanted to find out how people that had survived to mature age coped.
